PROFILE

I hold a degree as a specialized technician in IT development and recently graduated with a bachelor's degree in web and mobile engineering. Passionate about the IT field, I am eager to apply my skills in web and mobile development, programming, and stay updated on industry trends. Ready for new challenges and continuous learning.

WORK EXPERIENCE

Desktop Application Developer

PIF

01/05/2022–01/06/2022

- Intern at PIF Factory with a primary focus on creating a desktop application.
- Tasked with designing and developing the application to enhance internal operations.
- Contributed to improving the system by effectively managing inventory, personnel records, and sales figures.
- Streamlined stock management, monitored workforce data, and tracked sales performance through the application.
- Gained practical insights into optimizing business processes with innovative technological solutions.

Web Application Developer

ENSA-BERRECHID-Morocco

01/05/2023–01/07/2023

- Interned at ENSA Berrechid, developing an e-commerce web app with PHP Laravel.
- Contributed to design, implementation, and optimization for a seamless user experience.
- Successfully deployed a robust and efficient cosmetic products platform.
- Enhanced expertise in web development and PHP Laravel framework.
